

HMD LECTURE: Wednesday, December 10, 2014

Miscarriage and Abortion

Presented by Jini Tanenhaus, PA-C, MA

Both spontaneous and induced abortion are very common occurrences in women's lives and it would be unusual for a healer not to encounter the issues that arise surrounding these experiences. I will cover the physical, emotional, mental and spiritual aspects of miscarriage and abortion and how they present for healing. This work challenges us to expand our own container as a healer in order to hold all that is there from pain, confusion, conflict, and split intention, to hope, intelligence, spirit, courage, determination, and love. I want to provide accurate information and bring consciousness to a subject that is often taboo, kept secret, and that can create such tremendous stress and conflict within and between people, and to bring it into the circle of healing.

Jini Tanenhaus has been a Physician Assistant for almost 40 years and for the past 20 years has been working in the area of women's health with a focus on reproductive health. Her work includes providing women with information, counseling, and services for pregnancy termination. In addition, she has extensively provided professional training and presentations in this field. She recently received a national award for her work in the area. After years of working in traditional medicine, she decided that she wanted to be with clients in a different way. That led her to study Brennan Healing Science and become a healer. She currently has a small private healing practice while continuing her work as a PA. She is about to complete her training in a non-dual integrated healing modality based on the kabbalah at A Society of Souls.
